

Current Parasite Control Measures of Sheep and Goats in Michigan: A Statewide Survey.

Dear Sheep and Goat Producers,

We are seeking your help with a statewide survey forming a key part of a project concerning a sheep and goat parasite management program in Michigan. The purpose of this survey is to: 1) Record current methods used to control internal parasites in sheep and goats in Michigan. 2) Assess producer awareness of parasite management concerns and 3) Use results to improve educational programs seeking to improve parasite management strategies in MI.

This survey will run from June 14, 2010 until July 16, 2010. This survey is conducted via a telephone conversation.

If you would like to participate in this survey, or if you have questions regarding the survey, feel free to contact Shelby Bollwahn at 517-797-7231 or e-mail at sbollwahn@gmail.com. Your assistance in this important research will be very much appreciated.

Many Thanks,

Shelby Bollwahn
